Cuts (cut/copy/paste) In AutoCAD, you can cut the

entire object, a sub-part of an object, or a specific property of an object. You can use the Cut command to select an object and cut it in any way you like. This is commonly used when you want to make a change to an object without affecting the entire file. In AutoCAD, you can cut the entire object, a sub-part of an object, or a specific property of an object. Press **CTRL+X** to cut the object.
